Education

VIT AP University

Integrated M.Tech in Software Engineering

Sep. 2024 – May 2029

Amaravati, Andhra Pradesh

Relevant Coursework

- Data Structures
- Software Methodology
- Algorithms Analysis
- Database Management
- Artificial Intelligence
- Internet Technology
- Software Design Architecture
- Design Patterns

Projects

Career Pilot | *HTML, CSS, Javascript, Express.js, Node.js, AI APIs*

- Developed an AI-powered career guidance platform for students and job seekers
- Implemented personalized career recommendations and roadmap generation
- Integrated frontend and backend services for dynamic user interaction
- Designed a responsive and user-friendly interface

AI Resume Evaluator | *Make.com, LLM APIs*

- Built an AI-based resume evaluation system using Large Language Models
- Implemented resume scoring, feedback generation, and improvement suggestions
- Designed backend APIs for resume analysis and processing
- Improved ATS-focused resume optimization workflow

AI Text Summarizer | *Make.com, AI APIs, Google Docs*

- Created an AI-powered text summarization application for long-form content
- Implemented concise summary generation. Handled large documents efficiently
- Focused on improving readability and reducing information overload
- when user keeps google docs link of large text, this summarizer uses ai apis and gives the summarized text of input to the user

Dino AI | *AI Assistant Project*

- Developed an AI assistant focused on intelligent task handling and interaction
- Worked on prompt engineering and conversational response optimization
- Explored LLM-based workflows, automation concepts, used python libraries such as Gradio for frontend and Groq
- Enhanced user interaction through contextual AI responses

Technical Skills

Programming Languages: Python, Java, JavaScript, SQL

Frontend Development: HTML, CSS, React.js

Backend Development: Node.js, Express.js

Computer Science Fundamentals: Data Structures and Algorithms, Object-Oriented Programming, DBMS, Operating Systems, Computer Networks

AI/ML Concepts: Transformers, RAG (Retrieval-Augmented Generation), LangChain, Prompt Engineering, LLM Fundamentals

Tools & Platforms: Git, GitHub, VS Code, Postman

Leadership / Extracurricular

Collaborated with team members in Photon Club activities and technical events. Led a team project involving AI-powered application development..

Worked as team leader in a project.
