Education

VIT-AP University

Integrated M.Tech in Software Engineering

Sep 2024 – May 2029

Amaravati, Andhra Pradesh

Relevant Coursework

- Data Structures
- DBMS
- Operating Systems
- Artificial Intelligence
- Algorithms
- OOPS
- Computer Networks
- Software Design

Projects

Career Pilot | *HTML, CSS, JavaScript, Node.js, Express.js, AI APIs* | GitHub Repo

- Built an AI-powered career guidance platform for students and job seekers.
- Implemented personalized career recommendations and roadmap generation.
- Integrated frontend and backend services for dynamic user interaction.
- Designed a responsive and user-friendly interface for seamless navigation.

AI Resume Evaluator | *Make.com, LLM APIs* | Bot Link

- Developed an AI-based resume evaluation system using Large Language Models.
- Implemented resume scoring, feedback generation, and improvement suggestions.
- Designed backend workflows for resume analysis and ATS optimization.
- Enhanced resume quality by identifying skill gaps and improvements.

AI Text Summarizer | *Make.com, AI APIs, Google Docs*

- Created an AI-powered text summarization application for long-form content.
- Generated concise summaries while handling large documents efficiently.
- Integrated Google Docs links as input for automated summarization.
- Improved readability and reduced information overload for users.

Dino AI | *Python, Gradio, Groq API* | Live Demo

- Developed an AI assistant for intelligent task handling and conversations.
- Worked on prompt engineering and response optimization.
- Built LLM workflows using Python libraries like Gradio and Groq APIs.
- Enhanced user interaction through contextual and personalized AI responses.

Technical Skills

Programming Languages: Python, Java, JavaScript, SQL

Frontend: HTML, CSS, React.js

Backend: Node.js, Express.js

CS Fundamentals: DSA, OOPS, DBMS, Operating Systems, Computer Networks

AI/ML: Transformers, RAG, LangChain, Prompt Engineering, LLM Fundamentals

Tools: Git, GitHub, VS Code, Postman

Open Source Contributions

GirlScript Summer of Code 2026 | *Open Source Contributor*

- Contributed to open-source projects by identifying issues, submitting pull requests, and collaborating with maintainers.
- Worked on frontend bug fixes, UI improvements, and code quality enhancements.
- Gained hands-on experience with Git workflows, issue tracking, and code reviews.
- Ranked among active contributors and strengthened problem-solving through real-world contributions.
